SKIN

CONSULTATION

To determine which treatments and products are best suited to you and your skin's needs, a skin consultation is recommended.

We offer the latest treatments, tailored to suit your specific needs. Therefore in order to determine which treatment/ treatment plan is best for you we recommend a consultation.

After we've completed your consultation with you, we draw up a treatment plan, which is based on your skin, budget & time.

The consultation lasts between 30 – 45 minutes.

Basic Consultation: £25*

Advanced Skin Scanning Consultation £40*

* When you book a skin consultation get £15 off any product purchase on the day.

MICRODERMABRASION

Microdermabrasion improves the appearance of lines and wrinkles, enlarged pores, improves acne scarring, sun damage/pigmentation and stimulates collagen production. Using diamond tipped wands this gentle treatment deeply exfoliates the skin.

SKIN

AHA PEELS

Sometimes referred to as the 'lunchtime peel' as there is very little redness or downtime. This peel is working more from the inside out. AHAs help restore your skin to optimum health and fitness. With the latest in AHA innovation, LCA Complex, a powerful combination of Lactic Acid with a time released vitamin complex to deeply hydrate, refine and rejuvenate. Improves lines, wrinkles, lightens pigmentation and is also used to treat acne/acne scarring.

This peel can be done as part of a course, bi-weekly, or as a monthly maintenance treatment. Suitable for all skin types.*

MEDIK8 SUPERFICIAL CHEMICAL PEELS

Medik8 superficial peels are one of the most popular non-invasive cosmetic procedures performed to rejuvenate and revitalise the appearance of the skin. With little down time Medik8 chemical peels offer a results-driven therapy for a wide array of skin conditions, including fine lines and wrinkles, acne, acne scarring, hyperpigmentation, dry or flaky skin and many more.

For best results we recommend using a Medik8 Retinol product for 2 weeks to prime your skin prior to any peel.

DERMALUX™ LED PHOTOTHERAPY

Utilising clinically proven LED technology, Dermalux™ delivers excellent outcomes even after one treatment for a wide range of common skin concerns including:

Skin Rejuvenation	Eczema, Psoriasis & Dermatitis
Sun Damage	Sensitive & Inflammatory Conditions
Rosacea & Redness	Acne and Problem Skin
Restoring Radiance	Wound Healing and Scarring

HOW DOES LED PHOTOTHERAPY WORK?

LED Phototherapy uses colour wavelengths of visible light which have specific rejuvenating benefits within the skin. Skin cells have the ability to absorb light and use it as a source of energy to fuel the repair and rejuvenation of damaged cells or kill bacteria. It is a natural biochemical reaction similar to that of plant photosynthesis.

A discount is given when a course is taken for treating skin conditions on the body.

Before and after photos are on our website.

FACIALS

CACI NON-SURGICAL FACELIFT

If you feel your skin is showing signs of ageing, tiredness or lack of firmness then a CACI treatment is just what you need. This computerised machine passes tiny electrical currents (micro-currents) through the skin via two cotton-tipped probes, to reprogram slacked muscles back to their original state.

The CACI programme consists of a course of weekly treatments, followed by a monthly maintenance session.

REJUVAPEN NXT MICRO-NEEDLING

The Rejuvapen NXT is a revolutionary micro-needling collagen stimulation system that can help repair deep damage to the skin.

Rejuvapen works to smooth fine lines and wrinkles, improve scars, acne scarring and hyper pigmentation and reduce the appearance of stretch marks. The procedure can be performed on the face, neck, hands or chest and comes with minimal downtime. Results can be seen after about 1 month, however between three and six sessions are recommended every four to six weeks for maximum results.

The pen-like device, which contains 12- super-fine needles in the tip penetrates the surface of the skin to create tiny punctures to stimulate cell regeneration and naturally assists the skin to become smoother and firmer over a series of treatments.

A topical anaesthetic cream is applied to numb any discomfort, allowing the needles to go anywhere between 0.5 and 2mm deep into the superficial layer of the skin, depending on the individual needs of the client. Afterwards the skin will be a little red/pink but this quickly fades to leave a radiant glow.

Please see our website for FAQs

IPL ROSACEA AND THREAD VEIN TREATMENT

Intense Pulsed Light can provide a long term solution to facial problems such as red flushing (rosacea), thread veins and red spots as well as unsightly leg veins, with minimal risk in just a few quick and easy treatments.

IPL/LASER PIGMENTATION REMOVAL

Pigmented lesions such as age spots or freckles can be successfully lightened or removed with Intense Pulsed Light. Both treatments are non-invasive, suitable for both the face and body and will result in a more even skin tone.

IPL SKIN REJUVENATION

The IPL system regenerates the skin by heating the cells known as collagen within the skin so to regenerate cells and tissue to improve your complexion, skin texture and tone. The series of treatments increase the production of collagen over a period of time to increase the elasticity, skin thickness, smoothness, wrinkle reduction and resurfaces the top surface.
